DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Moriya et al. (Moriya) (US5,311,259).

Regarding claims 1-22, Moriya either explicitly or inherently discloses all of the claimed limitations as is evidenced by the fact that Moriya discloses an image forming that divides an original image into multiple areas depending on the magnification of copy and produces enlarged copies of the divided areas on sheets of copy paper sequentially, thereby obtaining a enlarged copy of the original larger than the paper size. For each divided area, copy paper of a smallest possible size necessary to copy the entirety of the divided area is selected. The original can be divided optimally based on the original size, copy paper size and magnification, or can be divided by excluding a specified region from the original (Please note: Abstract; col 1, line 7 - 6, line 60; figures 4, 36-37.)
